

13th International Symposium on Reconfigurable Communication-centric Systems-on-Chip

www.recosoc.org

July 9th-11th, 2018, Lille, France

Call for Special Sessions

During the past decade, **ReCoSoC** has established itself as a reference international event for researchers in the areas of reconfigurable and communication-centric systems-on-chip. Its informal and dynamic philosophy encourages the technical and scientific interactions between senior academics and young researchers.

ReCoSoC solicits proposals for special sessions within the technical scope of the conference. Special sessions supplement the regular program of the conference and can illustrate challenging, and emerging topics in both academia and industry. Beyond the conference area of interests, proposals on hot topics such as **FPGA as Acceleration-as-a-Service for cloud computing**, and **FPGAs for machine learning** are much welcomed. These two domains are not restrictive and any other proposal close to the ReCoSoC domains will be evaluated.

Special-session proposals should be submitted by the prospective organizer(s) who will commit to promoting and handling the review process of their special-session as Chairs or Co-Chairs of the event.

Papers submitted to special sessions will be evaluated along the very same criteria of the regular sessions.

Special Sessions Submission

Proposals for special sessions should include the following information:

- Title;
- Name(s) of organizer(s);
- Email of main contact person;
- Brief bio(s) of organizer(s);
- Brief description;
- Related topics;
- Potential participants;
- A draft of the Call For Special Session;
- Description of publicity and promotion plan;

ReCoSoC Special Sessions proposals must be sent to Special Sessions organizers before 31th January 2018

Special Sessions Organization

Daniel Chillet, Univ. Rennes, INRIA (Fr),
