SMILE
CONFERENCE SMART MANAGEMENT IN INDUSTRIAL AND LOGISTICS ENGINEERING

The *IEEE Engineering Management Review* invites high-quality original research contributions with a strong practical focus for a special issue dedicated to advancing industrial and logistics systems through smart, sustainable, and resilient engineering. This special issue seeks to highlight innovative methods, theoretical advances, and practical applications that drive transformation in the fields of logistics, manufacturing, and industrial engineering. The special issue is in collaboration with the SMILE 2025 Conference (Smart Management in Industrial and Logistics Engineering) and is **open by invitation only** to contributors from the conference community.
