

Sauvegarde et restauration de vos données de configuration MFA - Winauth

Exporter vos clefs

1. Lancez le logiciel Winauth

2. Cliquez sur la roue en bas à droite puis sur "Export..."

3. Sur cette fenêtre, cliquez directement sur "Browse ...":

4. Allez dans "Mes Documents" et nommez votre fichier afin de le retrouver facilement. Exemple : winauth_2025_02_27

5. L'interface d'export apparaît comme suit

6. Cliquez sur "ok"

Importer votre sauvegarde

Cette action est à réaliser après la migration de votre poste lundi matin.

1. Lancez le logiciel Winauth

2. Cliquez sur le bouton “Add” sélectionnez “Import”

3. Retournez dans “Mes Documents” et modifiez à l'aide du menu déroulant en bas à droite de la fenêtre “WinAuth Files (*.xml)” vers “Text Files (*.txt)” afin de voir apparaître votre fichier préalablement sauvegardé et sélectionnez le. Cliquez sur “Ouvrir”

4. Décochez "Protect with my own password" puis cliquez sur "OK"

Protection

Select how you would like to protect your authenticators. Using a password is strongly recommended, otherwise your data could be read and stolen by malware running on your computer.

Protect with my own password

Your authenticators will be encrypted using your own password and you will need to enter your password to open WinAuth. Your authenticators will be inaccessible if you forget your password and you do not have a backup.

Password

Verify

Additionally, you can protect and encrypt your data using the built-in Windows account encryption. This will lock your authenticators to this computer or user so they cannot be opened even if the files are copied. You MUST turn this off if you are going to reformat your disk, re-install Windows or delete this user account.

Encrypt to only be useable on this computer

And only by the current user on this computer

Lock with a YubiKey

Your YubiKey must support Challenge-Response using HMAC-SHA1 in one of its slots. Use the YubiKey personalization tool to configure the slot or click the Configure Slot button.

Slot 1

5. Votre WinAuth est de nouveau fonctionnel.
